SPECTRUM 200SC

termiticide

- because
subterranean
termites are
never too far
away!

SPECTRUM 200SC

termiticide

Surefire Spectrum 200SC, containing 200g/L Imidacloprid, is now registered for use in the control of all species of subterranean termites (including *mastotermes darwiniensis*) in both new and existing buildings.

Surefire Spectrum 200SC has these features to assist you with your termite management work:

1. A non-repellent application which binds readily to soil.
2. Can't be detected by termites, greatly assisting with colony control & elimination.
3. Easily applied with your existing treatment equipment.
4. Unbeatable value when compared to other non-repellent termiticides & other liquid termiticides.

Container sizes:	Carton quantity:
